

AVAT LABS
Db a Free Fall Testing Labs

Mission Statement

AVAT Labs (AVAT) is a Limited Liability Corporation (LLC), doing business as Free Fall Testing Labs, that has an ultimate goal of successful operation by providing the best in customer service while giving back to the local community. AVAT Labs will provide accurate testing with high integrity and excellent customer service while giving back to the local community by providing opportunities in paid internship programs to local students.

While making a modest profit, AVAT Labs will be able to offer a hands-on, paid internship to local, higher education students who are actively pursuing a Chemistry or Biological Degree. AVAT recognizes that the major challenge for students in these fields is actual laboratory experience. The goal for this unique program is to provide a degree candidate at a local institution a paid internship that equates to 2,080 hands-on laboratory hours. This program will enable students to gain the necessary laboratory experience to obtain gainful employment in their field after they have received their degree.

The paid intern program will be scrutinized greatly for individuals with a deep work ethic and a heart-felt regard for working with honesty and integrity. There will be many hurdles for the intern to overcome in the application process that concerns integrity. Specific examples of the testing of individual integrity will be required of the intern and references must be provided. These references will be researched during the interview process.

This paid intern program will also search for candidates that have proven customer service skills. Once in the intern program these customer service skills will be developed thoroughly. Once learned, these skills usually remain with the intern throughout their personal and work roles in any community. This unique intern program will comply with all state and local rules and regulations.

AVAT Labs is committed to providing excellent customer service while giving back to the community by offering local students paid internship opportunities. It is the combination of these two goals that will ultimately ensure the success of AVAT Labs.
